INTER-OFFICE MEMORANDUM

DATE: May 11, 1967

TO: Eugene Downs, Public Works Superintendent
FROM: George L. McPheeters, Water Division Engineer
SUBJECT: UNION CARBIDE - INDUSTRIAL WASTES

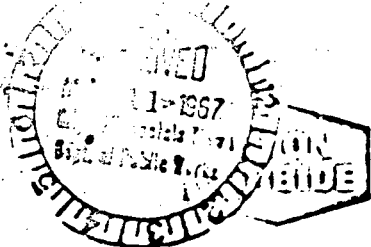

Mr. Routhier, Plant Engineer, by letter dated May 9, two copies attached, and by previous correspondence of April 27 agrees to conform to the City's requirements for industrial wastes.

We have not yet been advised of the anticipated date of installation of their new neutralizing equipment.

May 9, 1967

Director of Public Works
City of Mountain View, California

Attention: Mr. George, Mr. Pheeters, Water Division Engineer

Dear Sir:

Thank you for sending me a copy of the City of Mountain View Ordinance No. 175, 638. This is the first copy I have received and will abide by its contents.

I also wish to advise you that no solids or Trichlorethylene will enter the City sewer system due to the construction of our neutralizer. We have a cascade constructed settling pit up-stream of our neutralizer and also provisions in our holding tanks to collect such materials should they pass our settling pit.

We will not have any metals in solution entering the City sewer system.

Hope this answers your question satisfactorily.

Ed. Routhier
